

JAY AGRAWAL

Backend Developer | FastAPI | Node.js

Surat, Gujarat, India +918320839502 agrawaljay247@email.com [GitHub](#) [LinkedIn](#)

❖ PROFESSIONAL SUMMARY

Motivated **Python Backend Developer (Fresher)** with hands-on experience in **FastAPI, REST API development, and MongoDB**. Skilled in building scalable APIs, debugging, and backend logic. Passionate about clean code and problem-solving, seeking an opportunity to contribute and grow in a professional development environment.

❖ TECHNICAL SKILLS

- **Backend Technologies:** Python, FastAPI, Node.js, Express.js, REST API Development, JWT Authentication, MVC Architecture
- **Databases:** MongoDB
- **Frontend (Basic):** HTML, CSS, React
- **Tools & Platforms:** Git, GitHub, Postman, VS Code

❖ PROJECTS

Smart Local Service Platform | [Link](#)

- I developed a Smart Local Service Platform that connects users with local service providers.
- The frontend is built using **React** with **TypeScript**, and the backend uses **FastAPI**.
- Users can search, book, and track services, while providers manage bookings.
- A key highlight of this project is that I used my own reusable FastAPI backend template, which follows a modular and scalable architecture.
- This helped in faster development and ensured the system is production-ready.

Furniture Rental System | [Link](#)

- Developed a full-stack application using **React (TypeScript)** and **Python FastAPI** for furniture buying and rental services
- Designed and implemented **RESTful APIs** for product management, orders, and user operations
- Built features for **product browsing, rental/purchase selection, and order tracking**
- Ensured **efficient data handling and smooth frontend-backend integration**

❖ EDUCATION

Bachelor of Computer Application (July 2022-April 2025)

Vidyabharti Trust College of Business, Computer Science & Research, Bardoli, Surat
